

Eguana Launches Enduro Energy Storage Product at EES Europe

CALGARY, Alberta, June 07, 2018 (GLOBE NEWSWIRE) -- Eguana Technologies is launching its Enduro residential energy storage solution for the European residential market at this year's [EES Europe](#) show taking place from June 20th-22nd in Munich, Germany. EES Europe is the continent's largest, most-attended and most international exhibition for the battery and energy storage industry and is co-organized with Intersolar, the leading exhibition for the solar industry.

The Enduro is an "All in One" solution for the European self-consumption market, which has been engineered to provide the simplest and fastest installation possible and includes remote diagnostic and auto-recovery technologies to minimize site visits and ensure trouble-free operation. The Enduro allows home owners to use their own PV electricity whenever they need it - night and day - and can significantly reduce the utility bills, while providing emergency power through an integrated power outlet.

Eguana will also display its full global product lineup including the [Evolve](#) residential and [Elevate](#) C&I product lines, all of which are equipped with deep, advanced integration between Eguana's power controls and LG Chem's lithium ion batteries. The stackable, expandable design of the Evolve and Elevate products makes them an attractive energy storage option for a wide range of applications.

"The Munich show is one of the most attended renewable energy trade shows in the world attracting installers, distributors, and manufacturers from all regions," commented Justin Holland, Eguana CEO. "It provides the perfect venue and audience to roll out our fully integrated, factory assembled energy storage systems."

Eguana will exhibit its products [in the main energy storage hall at booth B1.618](#). Please contact the company if you are interested in visiting the booth for a personal introduction to the new product line.

About Eguana Technologies Inc.

Based in Calgary, Alberta, Canada, Eguana Technologies (TSX.V:EGT) designs and manufactures high performance residential and commercial energy storage systems. Eguana has two decades of experience delivering grid edge power electronics for fuel cell, photovoltaic and battery applications, and delivers proven, durable, high quality solutions from its high capacity manufacturing facilities in Europe and North America.

With thousands of its proprietary energy storage inverters deployed in the European and North American markets, Eguana is the leading supplier of energy storage solutions for solar self-consumption, grid services, and demand charge applications at the grid edge.
